

Wine, Beer & Liquor Retail

- *The US beer, wine, and liquor store industry includes about 30,000 stores with combined annual revenue of about USD 45 billion.*
- *However, the segment is extremely fragmented with the top 50 companies accounting for less than 20% of the sales.*

Obvious from the statistics is the level of challenge that a small wine, beer and liquor store faces.

Personal income, consumer tastes and lifestyle preferences are the main contributing factors in generating demand.

With a direct competition from convenience stores, grocery stores, clubs and indirectly from restaurants and bars, a small retailer is faced with an enormous challenge to not only generate revenues but also to retain customer and customer loyalty.

Competitive pricing, superior & personalized customer service and specialized merchandize are some of the core challenges that this industry faces.

Local regulations aside, retailers need a robust inventory control to analyze movement of goods – which goods are moving faster than the others.

To cater to the seasonal demands, the retailer needs to have a flexibility to create assortments and gift packs with ease.

Such a balance requires an integrated business management solution that allows flexibility to cater to the diverse & unique demands of Liquor Retailers. A system that seamlessly integrates all business processes from the POS at store to the planners at the Head Office lowering the overall cost of operations, simplifying expansion and enabling the Liquor Retailer maintain his unique proposition and positioning.

BENEFITS

Stay connected with your business operations

iVend Retail comes as an end-to-end business solution for Beer, Wine & Liquor retailers seamlessly integrating point of sale, in store inventory management, logistics, back office store and head office processes.

iVend integrates with SAP Business All-in-One and SAP Business One for head office operations and is an extensive retail

management application to manage store and POS operations.

Inventory control and replenishment

Head office operations get complete visibility of stock across the retail chain and can effectively push stock rather than relying on store requisitions. Additionally the merchandising department can raise purchase orders in time to avoid stock out situations.

Store Managers and POS operators can gain complete visibility of stock across stores or at the main warehouse / distribution centers right from the POS interface.

Smoothly process routine and complex transactions

Combine multiple transaction types with in single POS transaction. POS operators can process a sale refund and sale transaction in a single transaction rather than a two step process.

Promotions that maximize profitability

Manage targeted promotions in multiple formats by easily analyzing detailed customer trends at individual stores and across the retail chain.

Retain customers and manage customer communication

The loyalty management module in iVend allows you to define flexible / attractive campaigns, ensuring customer loyalty.

Get a full range of analytics and service capabilities that help you better understand customer's trends and design promotions that maximize the potential of all your customer relationships by informing customers of available points, their value and their validity.

Grow your average sales ticket

Pop Up sell and alternate item suggestions pop up on the POS interface enabling the POS operator to make additional recommendations to the customers.
