

Fact Sheet

Why Microsoft Dynamics NAV?

Microsoft Dynamics NAV is an integrated, adaptable business management solution that helps midsize retailers execute business decisions with greater confidence. As a leading ERP in Mid-Market, Microsoft Dynamics NAV has been successfully automating and streamlining business processes and connecting enterprise with global customers.

iVend Retail and Microsoft Dynamics NAV

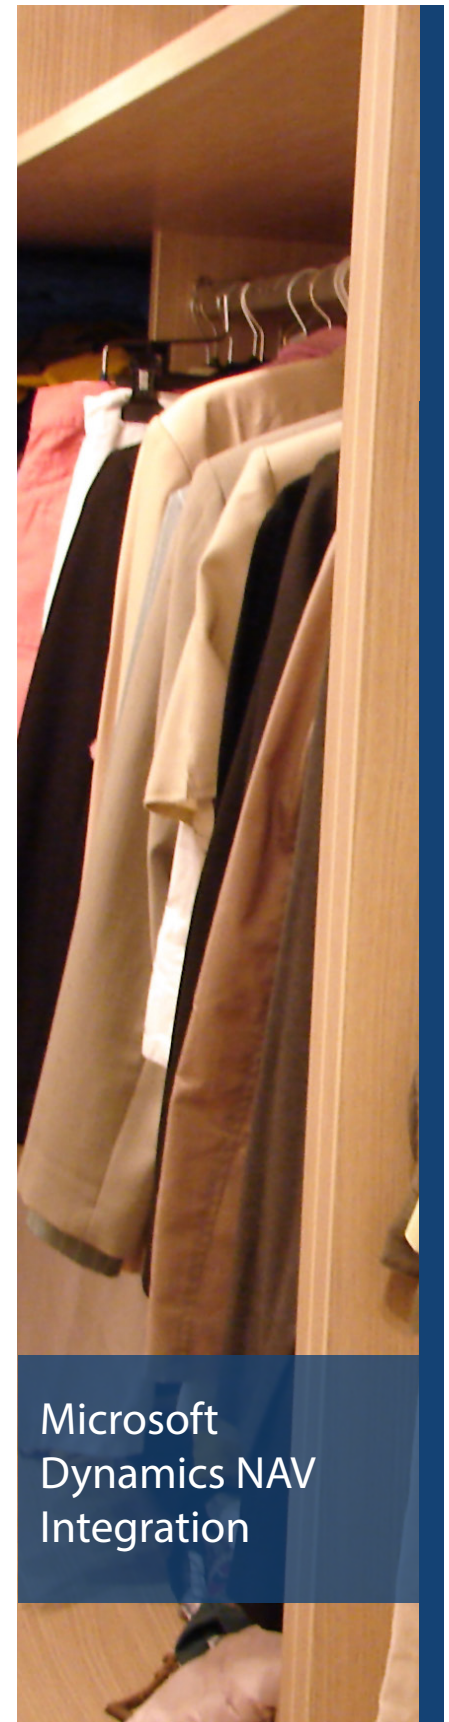

Well suited for midsized retail businesses, iVend Retail management suite integrated with Microsoft Dynamics NAV can help retailers adopt omnichannel capabilities with ease. The seamless integration between iVend Retail and Microsoft Dynamics NAV improvises end-to-end retail management with minimal manual intervention and streamlined retail functioning. Retailers can deliver great shopping experience, with an enterprise ready omnichannel solution that is more mobile, more digital and global.

iVend Retail integrates with Microsoft Dynamics NAV using iVend Retail's APIs. The entire landscape is designed to utilize the best practices inbuilt in the Microsoft Dynamics NAV for enterprise processes and extend them via iVend Retail to the retailer's entire retail business.

The iVend Retail & Microsoft Dynamics NAV in Retail

iVend Retail is configured with Microsoft Dynamics NAV at the central location – typically the Head Office. The retail operations are connected to iVend Enterprise – the central Head Office component of iVend Retail. The stores connect to iVend Enterprise over an Internet connection. The application is so designed that even if the Internet connectivity between the store and the Head Office breaks, the stores will continue to carry out transactions. This is brought about by the failsafe replication of data across all stores.

- iVend Retail enables to maximize sales potential by implementing fully integrated sales growth programs across all sales channels
- iVend Retail helps executives and managers get a better focus on the business through easy to use and contextual dashboards and management information
- iVend Retail allows to achieve sales objectives with a lower stock to sales ratio and to focus inventory where it is most needed
- Promotions management functionality and customer loyalty programs help boost sales.
- iVend Retail allows to run a single stock pool across all sales channels which allows to reduce stock holding and improve stock turns
